

Economic Review

Amid the global pandemic infecting more than six million people since it started in early Jan-20. The health systems have initially responded with lockdowns to flatten the infection curve and now after a period of more than four months the world has gradually started to open up. Pakistan has faced the situation with its limited resources with government trying to balance the economic woes to health of the society. The spread had been contained during the lockdown period with spikes in infections coming immediately after some relaxations. Despite the overall situation the low fatality rate has kept hopes high that the country will be able to emerge with limited dents compared to the initial fears.

Gov. also came up with fiscal and monetary package to aid the economic situation with a package of around PKR1,200 billion and central bank slashing policy rate by 5.25%. SBP also came with guidelines for relaxation of debt repayments to industries in order to give some fiscal space to industries hit during the pandemic. Pakistan also received emergency fund from IMF of around USD1.3 billion. The global slowdown also had its positive affects in local inflation numbers. Inflation figure have shown signs of respite as govt. passed on the impact of decline in fuel prices to consumers. Local demand wiped out by the lockdown also aided in cooling off the Consumer Price Index (CPI). Inflation figure for the month of Apr'20 moved to 8.5% on YoY basis while average CPI for 10mFY21 stood at 11.22%. Inflation figures will continue in the single digit trajectory bearing international oil prices traverse in range bound fashion.

On the monetary front, SBP conducted Tbill auction on 20th May witnessing a participation of around PKR1,049bn with Central Bank accepting bids worth PKR215billion with cutoff yields of 8.1496%, 7.8050% and 7.7499% in 3month 6month and 12 month tenor respectively.

SBP also conducted GOP Ijara auction on 22nd May with a target of PKR75bn. Total participation of PKR114 billion was witnessed in this auction in the range of -150 to 35bps around the benchmark. SBP accepted bids around PKR74billion at a spread of -10bps.

The Gov. issued a Sharia Compliant Debt instrument (Pakistan Energy Sukuk) through a competitive bidding process at Pakistan Stock Exchange. Power Holding Limited (PHL) auctioned the sukuk and raised a total of PKR199.96billion at a base rate of 6month KIBOR minus 10bps.

Equity Market Review

After posting a gain of around 23% in Apr'20 KMI 30 shed miniscule points (down 0.6% on MoM) in a consolidation phase. KSE100 also declined by 0.53% during the month while the index reached a peak of 34,393.12 and touched a trough of 33,126 during the month. Investors remained sidelined amid concerns on post lockdown scenarios and growing cases of COVID-19. Foreign Investors continued to remain sideline with net selling of around USD40mn along with Banks and Mutual Fund. Going forward amidst the growing infection figures in the country along with some concerns raised by World Health Organization (WHO), declining yields on various asset classes followed by expectation of another cut in upcoming MPS can aid in channeling funds to restore investors' confidence equity class.

Country	Index	May-20	Apr-20
UK	FTSE-100	2.97%	4.04%
